Internal Hyperlinks

15

The image shows a Notepad window titled "test - Notepad" with the following HTML code:

```
<html>
  <head>
    <title> Second Page</title>
  </head>
  <body>
    <a href="firstpage.html">First Page</a>
  </body>
</html>
```

The code is displayed in a blue-themed Notepad window. A red dashed box highlights the anchor tag: `First Page`. To the right, a browser window titled "N:\HTML\test.html" is shown. The browser's address bar contains "N:\HTML\test.html" and the page title is "Second Page". A red dashed box highlights the browser's address bar and title bar. Below the address bar, the text "First Page" is displayed as a blue, underlined link, also highlighted with a red dashed box.

Task: For the internal hyperlinks to work you need to make sure you have create more than 2 HTML pages and that you have linked the correct pages together.

Graphical Hyperlinks

16

```
test - Notepad
File Edit Format View Help
<html>
  <head>
    <title> Second Page</title>
  </head>
  <body>
    <a href="http://www.google.com"></a>
  </body>
</html>
```

Task: Practise creating your own graphical hyperlink to a suitable website.
